Some Insights

1. Export value shows seasonal fluctuations across months
2. Certain Oceanic countries dominate India's export market
3. A small number of commodities contribute the majority of export value
4. Some commodities have high quantity but low monetary value
5. Export distribution varies across regions and sub-regions
6. India’s exports to Oceanic region are highly concentrated in a single major market
7. Australia & New Zealand region dominates exports compared to other sub-regions
8. Kilogram (Kg) is the most frequently used unit, indicating that exports are largely weight-based commodities
